

## To Install Hand Held Showerhead Filter:

1. Remove existing showerhead from shower.

2. Wrap Teflon tape tightly around shower pipe threads.

3. Screw the universal mount onto the shower pipe.

4. Tighten the mount, using a soft cloth to protect the finish.

5. Insert a black rubber washer (included) into the smaller threaded end of the shower hose and attach to the universal mount.

6. Insert a black rubber washer (included) into the larger threaded end of the shower use and attach to the threaded end of the showerhead handle.

7. Hang showerhead in bracket, test system for leaks and tighten fittings as needed.

## To Replace Filter:

1. Hold the handle of showerhead firmly in one hand. With the other hand turn the ribbed ring behind face clockwise to unscrew.

2. Grasp white filter cartridge and pull filter up and to the side to remove. Replace new filter by pushing it firmly down into the cavity until seated.

3. Align threads by turning whole faceplate counter clockwise until faceplate clicks into cavity. Then turn only the ribbed ring behind faceplate in a counter clockwise direction until secure.

## 5 Functions
